# EV Flash Report

## Battery Scorecard

**Battery Condition Indicator** — EXCELLENT

KEY ON-VEHICLE INDICATORS*

| ESTIMATED CAPACITY | MAX VOLTAGE DEVIATION | EQUIVALENT FULL CYCLES |
|---|---|---|
| 100% | 6mV | 10 |

+ ADDITIONAL KEY METRICS CONSIDERED

**Battery Build & Longevity** — EXCELLENT
BASED ON KEY BATTERY ATTRIBUTES

**Relative Condition** — EXCELLENT
BASED ON COMPARATIVE TESTED VEHICLES

**Reliability & Ongoing Support** — EXCELLENT
BASED ON VEHICLE MAINTENANCE METRICS

*Results derived from data collected directly from the vehicle. Use the QR code to perform an independent battery health assessment on this vehicle.

## Range Estimates (Miles)

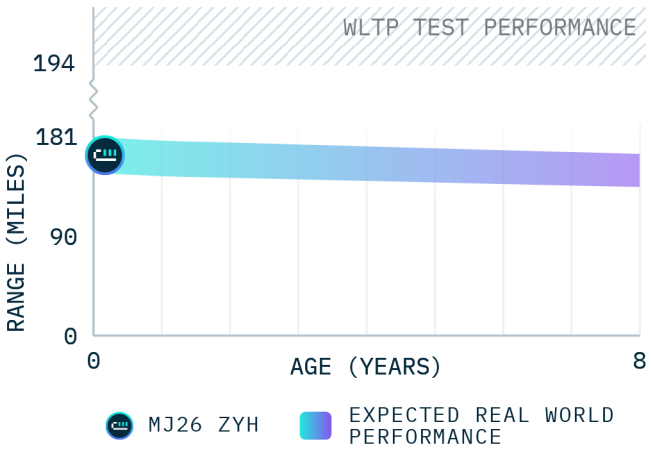
| Low | Typical | High |
|---|---|---|
| 126 - 137 | 158 - 171 | 173 - 188 |
| URBAN 0% | URBAN 70% | URBAN 100% |
| MOTORWAY 100% | MOTORWAY 30% | MOTORWAY 0% |
| WINTER | AUTUMN SPRING | SUMMER |

1 Range estimates for 3 sets of driving conditions reflecting real world performance. These values may differ from official manufacturer data.

# MJ26 ZYH

| | |
|---|---|
| EXECUTED BY | Car360 |
| TEST COMPLETED AT | 29.06.2026, 14:44 |
| MAKE/ MODEL | Renault 5 |
| MODEL VARIANT | E-Tech 40kWh 120hp |
| YEAR OF MANUFACTURE | 2026 |
| VEHICLE TYPE | BEV |
| ODOMETER READING (MILES) | 1,776 |
| VIN (LAST 4 DIGITS) | 6292 |
| ORIGINAL BATTERY KWH (TOTAL) | 43.0 |
| ORIGINAL BATTERY KWH (USABLE) | 40.0 |

## Predicted Range Performance (Miles)



2 Predicted range performance for this vehicle based on aggregated degradation data.
WLTP tests are carried out in perfect lab conditions and do not accurately reflect real world performance.

| REPORT ID | ISSUED ON |
|---|---|
| MJ2Q7R96EU | 29.06.2026 |

POWERED BY

## Battery Warranty

WITHIN THRESHOLD

The original battery warranty for this vehicle lasts **8 years** or **100,000 miles**, whichever comes first. Other criteria may apply.

### Remaining Warranty Mileage

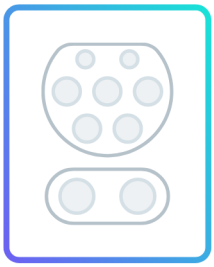
98,224 MILES LEFT

### Remaining Warranty Time

7 YEARS 10 MONTHS LEFT

3 The battery warranty has not expired on this vehicle.

## Charging Compatibility



**AC Charging**
TYPE 2

**Public UK AC chargers**
90,172 SLOW/FAST

**DC Charging**
CCS

**Public UK DC chargers**
24,150 FASTEST

DC charging relates to rapid charging at locations such as motorway services and petrol stations. To view all public chargers in the UK, head to zapmap.com.

## Charging Port Location

**Front Left Side**

This vehicle is equipped with a charging port located at the **front left side**.

## Charging Figures (10–80% Charge)

| TYPE | TYPICAL LOCATION | | TIME TO CHARGE | AVERAGE COST |
|---|---|---|---|---|
| **Slow** | Home (7.4kW) | ☾ | 4 h 9 min | £3 |
| | | ☼ | 4 h 9 min | £7 |
| **Fast** | Supermarket | | 2 h 48 min | £15 |
| **Fastest** | Motorway | | 23 min | £22 |

- Data reflects the **average** time and cost to charge the vehicle from 10% to 80% at the time of print.
- Charging above 80% should be reserved for longer trips to preserve battery condition.
- Energy night tariffs can provide substantial savings when charging at home overnight.
- This vehicle's maximum DC charging rate is **80 kW**.

## Further Vehicle Data

### Air Quality

CAZ ULEZ

This vehicle can enter Ultra Low Emission Zones (ULEZ) and Clean Air Zones (CAZ) free-of-charge.

### London Congestion Charge

£15/DAY

This EV will need to pay the £15 daily Congestion Charge when travelling into London during certain hours.

### Vehicle Classification

ULEV/ZEV

This vehicle is classed as an Ultra Low Emissions Vehicle (ULEV) and a Zero Emission Vehicle (ZEV).

### Road Tax / Vehicle Excise Duty (VED)

£200/YR

This vehicle will incur road tax of £10 for the first year then £200 annually.

### Original Vehicle Warranty

WITHIN THRESHOLD

The original **vehicle** warranty is 3 years or 100,000 miles.
There are 2 years 10 months or 98,224 miles remaining.

## 1 Range Insights

ClearWatt provides range data for vehicles under 3 different driving scenarios. These scenarios reflect the most common, the lowest, and the highest range figures you can expect from this car. These figures are **estimates** and subject to variability. Factors like the vehicle's driving mode, climate control settings, and the driver's driving style will affect the range achieved on full charge. The lab-based WLTP combined range for this car is **194 miles**.

## 2 Predicted Range Performance

ClearWatt aggregates data from multiple sources, including our data lake of test results to plot predicted range performance. These figures are estimates and will depend upon the specific usage and future treatment of the vehicle. Frequent rapid charging of electric vehicles will accelerate battery degradation and should be avoided where possible.

## 3 Battery Warranty vs Vehicle Warranty

- EVs typically come with two separate warranties, one for the vehicle and one for the battery inside the vehicle.
- Vehicle warranties typically cover any faults with the motor, drivetrain, electronics and control systems of the car.
- The battery warranty provides protection against accelerated battery degradation and battery faults. The battery warranty covers the performance of the battery, ensuring the performance does not drop below the manufacturer's stated threshold. Speak to your EV retailer to find out more information about the current status of the battery warranty on this vehicle.
- This report provides the status of the vehicle in the context of the original stated manufacturer's battery and vehicle warranty. Additional criteria or information may be requested or required from the manufacturer in order to validate a claim.

This certificate is an assessment based on data obtained from the vehicle's on-board systems and other industry sources. It is not issued, endorsed, or verified by the vehicle manufacturer. The results represent the battery's condition at the time of testing and do not guarantee future performance, reliability, or lifespan. Any modifications or subsequent changes to the vehicle or its systems may render this certificate invalid.
